## SUMMARY

A software engineer with a solid foundation in computer science and a strong interest in understanding systems in depth. Always looking for challenging projects to grow professionally while creating relevant solutions, and continue innovating, and pursuing excellence.

---

## EXPERIENCE

### IOS Software Engineer

FourSys

November 2024 - Present, Remote

- Engineered and deployed key features for the Bradesco iOS app, enhancing user experience and functionality.
- Successfully navigated and enhanced a large-scale, complex codebase, improving maintainability and performance.
- Applied Agile, Swift, and Software Architecture best practices daily.

### Intern

Airbus Defence and Space

April 2024 - August 2024, Ingolstadt, Germany

- Wrote a thesis on the identification and provision of security measures for onboard military aircraft software.
- Researched and deepened the knowledge of cyber-security, as well as software engineering.

### Jr. Mentor

Apple Developer Academy PUCPR

January 2023 - February 2024, Curitiba, Brazil

- Guided and mentored a group of 50 students in coding iOS native Apps.
- Provided 1-on-1 coding sessions and taught concepts such as Object-Oriented Programming, code optimization, Clean Code principles, and versioning control.
- Assisted students in understanding and using Apple's newest frameworks.

### Learner

Apple Developer Academy PUCPR

March 2021 - December 2022, Curitiba, Brazil

- Created a great quantity of native iOS Apps in Swift, using a variety of frameworks from Apple.
- Learned Object-Oriented programming, project management, design patterns, and software architecture.
- Gained some introductory knowledge in UX/UI design and business.
- Developed soft skills such as storytelling, teamwork, and effective interpersonal communication.

### Jr. Developer

Fast Pro

July 2020 - September 2020, Remote

- Built a dashboard to map and visualize mobile network dead zones in São Paulo.
- Utilized JavaScript to parse and analyze geospatial data collected from a mobile, city-wide geolocator to pinpoint network failures.

---

## EDUCATION

### Bachelors in Computer Science

Federal University of Paraná • Curitiba, Paraná • Nov 2021 - Present

---

## AWARDS & HONORS

### WWDC Swift Student Challenge

Apple • Apr 2022

- Awarded for developing Atom, an app about reality and perception.

### WWDC Swift Student Challenge

Apple • Apr 2021

- Awarded for developing The World Is Quiet, an app that teaches the alphabet in Brazilian sign language.
-

# SKILLS

---

Swift, UIKit, SwiftUI, Combine, RxSwift

Object-Oriented Programming, Git, Clean Code, Teamwork, Communication

Algorithms, Cyber-security, Operational Systems

JavaScript, Python, C

Portuguese, English, German
